(a) subspace rotation
dashed: random subspace (0.005)
mean cos² of principal angles
0.15
0.22
0.26
0.35
tasks learned before the end
(b) layerwise exactness
mean over probes
maximum
change of old-task logits
energy outside the subspace 1 − ρ
(c) stored directions
13 dir.
15 dir.
17 dir.
21 dir.
forgetting
energy threshold ρ
